

I respectfully urge the FCC to reject the NAB Petition 04-160.
I have chosen to pay a monthly service fee whereby I can get radio, weather and traffic information without the ever increasing annoying commercials that insult a person's intelligence on the public stations.

The NAB should find something else to fix, like maybe the radio stations that only through sheer accident can you find music that occasionally interrupts the endless flow of mindless commercial ads mostly from car barkers.

For the benefit of the NAB, I had long since given up commercial radio and drove in silence or CD music even before subscribing to satellite radio.

They will never get me back as a listener even if they destroy satellite radio.

Thanks and best regards,

Richard Ward
